- **Security**

- <http://appadvice.com/appnn/2014/09/how-to-set-up-touch-id-on-your-new-iphone-6>

- **Cloud and local storage**

- <http://www.cultofmac.com/296755/set-up-iphone-6/>

- **File sync of office documents**

- **Contact DTCT to discuss how best to set this up**

- **Remotely connecting to office machines**

- **Download Microsoft Remote Desktop client from app store. You must already be able to logon to your machine remotely. If so, then put the IP address and setting in from your PC into this app.**

- **How to sync your office email to your device**

- **Exchange** <http://blink.ucsd.edu/technology/email/mobile/iphone6-ex.html#2.-Select-the-account-type>.
- **POP3** <http://www.names.co.uk/support/1180-how-to-setup-a-pop3-account-on-iphone-ipad-iphone5-iphone6.html>
- **IMAP**
http://www.names.co.uk/support/email/support_centre/imap_client_configuration/1182-how-to-setup-an-imap-account-on-iphone-ipad-iphone5-iphone6.html

- **Conference call**

- <http://www.iphonefaq.org/archives/97919>

- **VOIP**

- **Your office would currently need to have a hosted VOIP phone system. Contact DTCL if you would like to discuss if hosted VOIP phone system would work for your office.**

- **Do not disturb feature**

- <http://www.everythingicafe.com/how-to-use-do-not-disturb-on-iphone/>

- **Becoming a wireless hotspot**
